

how to fold *your zine*

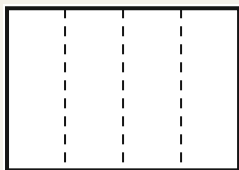

NULLZINE NO. 02 · THE MONTH WITH NO DOOR · TWO SHEETS · TWO BOOKLETS ·
SIXTEEN PAGES

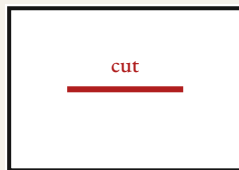

1.
Print each sheet at
100% / actual size,
landscape. Not “fit
to page”.

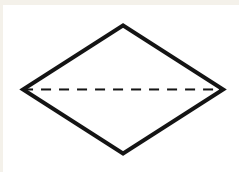

2.
Fold in half the
long way, pictures
outside. Crease well,
then unfold.

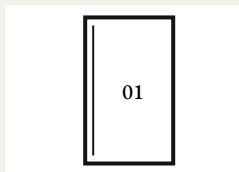

3.
Fold in half the
short way, then
fold each half back
to the middle. You
get **8 panels**.
Unfold.

4.
Fold the short way
again and **cut along
the middle line**,
only between the
two centre panels
(the dashed line on
the sheet).

5.
Open the sheet, fold
it the long way, and
**push the two ends
together**. The cut
opens into a
diamond.

6.
Flatten it into a
booklet with the
cover on the front.
Repeat for the
second sheet.

Make one, or make the whole.

One part: each sheet folds into its own 8-page booklet. Part i is chapter one, part ii is chapter two.

The whole zine: fold both. Lay part ii behind part i, both closed, spines together and edges lined up. Staple twice through the spine, about 2 cm from the top and bottom, or tie it with thread through two small holes. Now it reads straight through, 16 pages.

Tips: 100–120 g paper folds cleaner. Home printers leave a thin white border at the sheet edge, which is normal. The black-and-white files save ink. For personal use, please don't resell.
